BEVERAGE
SYSTEM CLEANER

32 OZ. (946 ML)

VANTAGE SYNERGY BIOMASS REMOVER

DIRECTIONS FOR USE:

1a. Power User Blend (preferred):

NOTICE:

ONLY mix Vantage Synergy products with each other.

NEVER mix any other chemical products with Vantage Synergy products.

First, fill Cleaning Bucket with water, then:

Add: 2oz Vantage Synergy Biomass Remover per gallon of water

Add: 2oz Vantage Synergy Demineralizer per gallon of water

Add: 2oz Vantage Synergy Accelerator per gallon of water

1b. Traditional User Blend:

For use with CO2 pots and recirculating pumps. Fill cleaning container with water.

Add 1 oz. Vantage Synergy Biomass Remover per gallon of water.

If beverage manufacturer requires 2% equivalent: use 8 oz per gallon of water.

2. Load system with cleaning solution and drain out beverage.
3. Recirculate for no less than 15 minutes, 10 minutes with Power User Blend
4. Flush cleaning solution from lines and rinse with clean water.
5. Load system with beverage and drain out rinse water until beverage appears.
6. Draw beverage and test for quality and clarity.

Extreme or long-standing soil loads may require more chemistry, contact time, flow rate and/or temperature.

CAUTION: KEEP AWAY FROM CHILDREN
